OUR MISSION

To provide a level of service that will exceed the expectations of our clients. Maintain the highest level of quality and allow our employees the opportunity to grow and prosper. To instill confidence with all parties by professionally managing all aspects of the project whether it is large or small.

DOKU Construction's mission is to provide reliable, quality and aesthetic buildings to its customers with innovative and sustainable construction solutions. The company, which develops projects on a global scale and builds environmentally sensitive structures integrated with advanced technology, aims to produce projects that add value to different cultures and societies and increase the quality of life. By prioritizing customer satisfaction, DOKU Construction, which combines engineering excellence and creative design, offers trust and quality as a guarantee in every project.

The core of our company is to act with integrity in all our interactions, to provide our clients with real value gained from our experiences in national and international markets.

Our vision is to maintain and develop our presence as a leading contractor company in the market, whose reputation built on trust that we provide our clients with high quality and efficient service through innovative applications of engineering capability and technology.

DKU Construction's vision is to be recognized as a leading brand in the international construction sector with its innovative, sustainable and reliable projects. While building the cities of the future, the company, which aims to provide solutions that respect the environment, use technology effectively and prioritize aesthetic values, aims to be the most preferred, reliable and respected position in its sector. With its engineering strength, technical expertise and customer-oriented service approach, it aims to leave its mark with projects that create value throughout the world.

OUR VISION

ARCHITECTURE THE

DOKU®

COMPANY INFORMATION

Modern architecture stands out as a creation process in which human-oriented design is blended with aesthetics, functionality and environmental responsibility. With technological advances, architecture is no longer limited to just building a building; it also aims to transform that structure into a life experience. In this approach, the needs of users, the environment they live in and the aesthetic understanding are integrated with sustainable materials and innovative technologies.

preface

In modern architecture, it is of great importance to ensure a balance of form and function, and at the same time to produce structures that respect nature and have high energy efficiency. Today, architects design buildings not only as physical structures; they are livable ecosystems that meet the emotional, social and environmental needs of people. This approach forms a foundation for smart cities and sustainable structures; because modern architecture aims to improve the quality of life and exist in harmony with nature with a vision that extends to the future.

HSE

At DOKU YAPI, Health, Safety, & Environment is one of our core values which is embedded within each employee when conducting all activities through a structured system to manage all risks in order to achieve our ultimate goal of "Zero Harm to People, the Community and Environment".

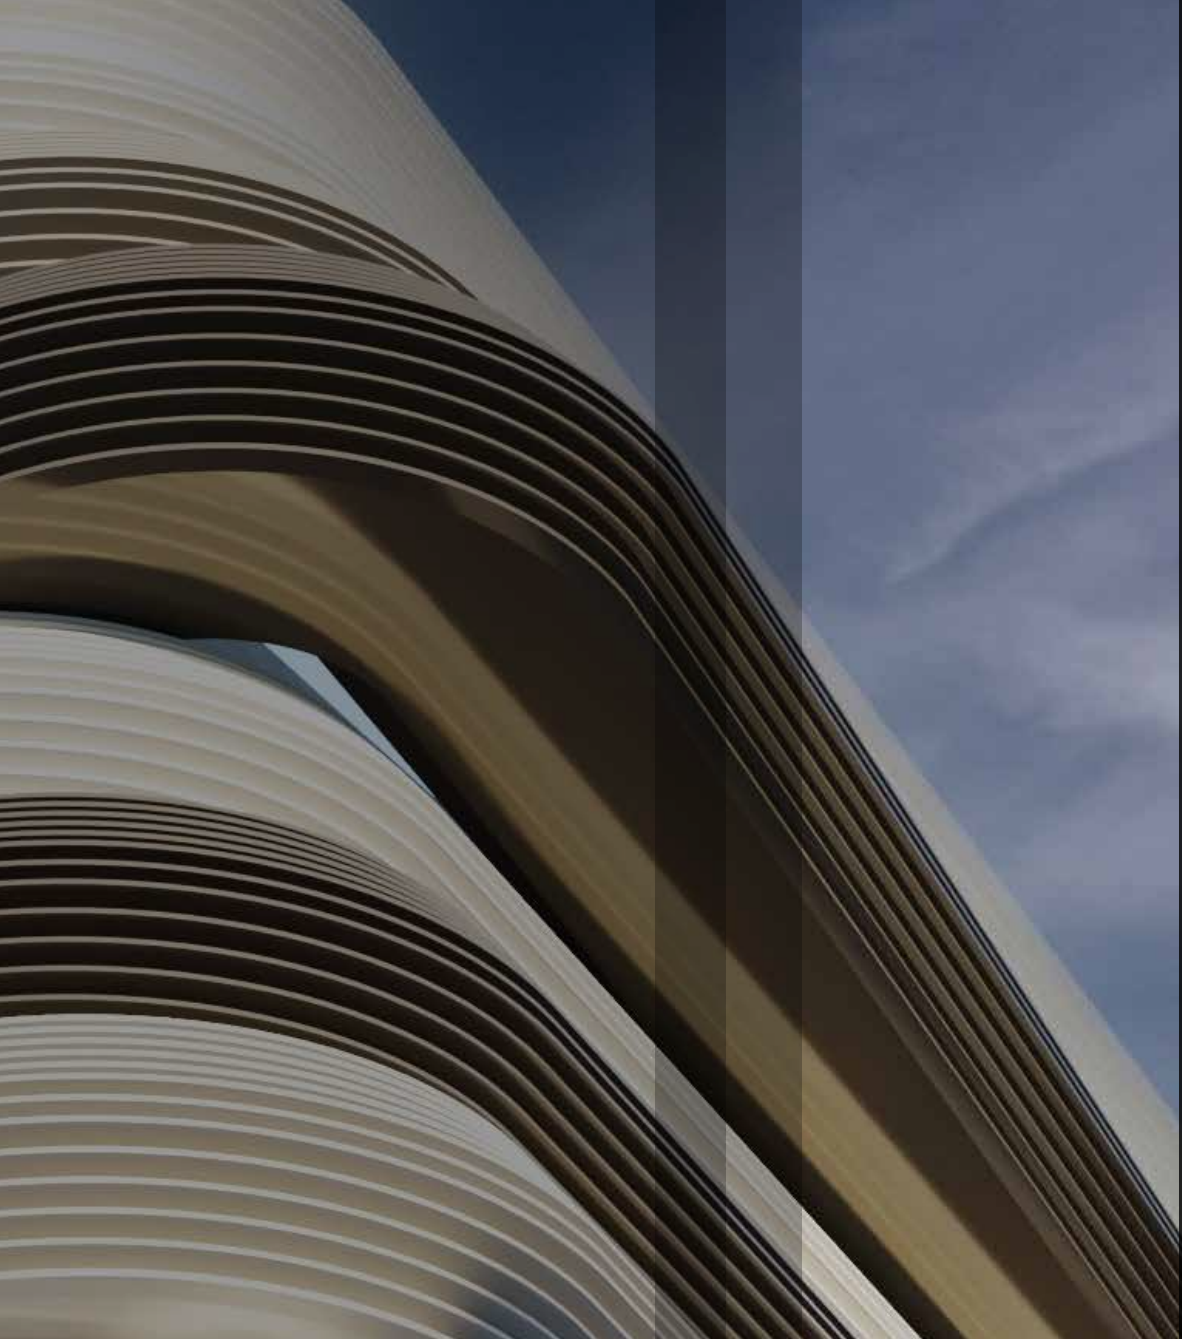

We are strongly committed to ensure the implementation of all related legal and other requirements, and the continuous improvement of our Health, Safety, & Environment Management System. We also strive to prevent damage and achieve safe, efficient and productive operations including:

Our core values

- :: Health, safety and working environment
- :: **Environmental**
- :: Training
- :: **Protective clothing and equipment**
- :: Evacuation
- :: **HSE management plan**

QUALITY MANAGEMENT

Quality Management's main priority is to fulfil our client's needs and build strong relationships to add value to their operations. We focus on delivering value to all of our clients by implementing our DOKU YAPI Quality Management System (QMS). Fundamental business processes reside within this integrated QMS system to meet the requirements of operations, quality and Health, Safety & Environment. We are committed to achieving the requirements set out in ISO 9001:2008 and continuously improve our services, systems and processes. This will be accomplished through:

- :: Standards
- :: **Other Documents**
- :: Local Laws, Regulations, and Practices
- :: **Voluntary Principles**
